V: WO 96/28262, Texwipe, already discloses articles with a cell system with a cell having an easy opening means (page 3 , line 5) in the form of a peelable seal.

The claims referring to the composition and dimensions of the cell appears to fall withing the average skilled mans routine since apparently no surprising technical or functional effect results therefrom.

Laser scoring for easy-opening means is known as such: EP-A-540 184, ANC.

Pull strings for easy opening are known in cell system packages: WO 97/04831.

US-A-3 826 259, Bailey, already shows articles of the kind folded on itself.

VIII: Claim 1: the meaning of "system" is unclear since claim 1 may comprise a single filled cell as such as well ("at least one burstable cell"), which hardly can be said to form a system.

The meaning of claim 17 is obscure; it appears to describe the natural way of use of such a package.
